FREQUENTLY ASKED QUESTIONS

1. WHAT IS A SEPTIC SYSTEM INSPECTION?

- It is having a certified and knowledgeable person compile information about the location and performance of the septic system.
- A report is submitted with an accurate drawing of the system components and their location.
- The report contains everything about the system, how it has been performing and how it should perform based on expected usage.

2. WHY DO AN INSPECTION ON A SEPTIC SYSTEM?

- To gain knowledge prior to buying or selling a house
- To prevent unexpected hazardous and expensive emergencies
- To help figure out ways to make improvements.
- A very important reason is that systems can be malfunctioning but you do not always need a new system immediately.
- Find out how maintenance will help.
- Other reasons and important information obtained, such as: obtaining a building permit or will I be able to add on to my house?
